Queensland Fire and Emergency Services
2022-23 Consultancies

Information

Consultancy information must be published through the Queensland Government Open Data website in accordance with the *Annual report requirements for Queensland Government agencies 2022-23*.

- For your reference, the Queensland Government Open Data website is as follows:

<https://data.qld.gov.au/>

Annual Report Requirements 2022-23 section 31.1

Consultancies

Agencies must disclose the following information:

- consultancies expenditure broken down into categories relevant to the agency; and
- the total cost of consultancies.

The amounts disclosed should align with the basis of expensing such costs in the agency's financial statements. This will be on a GST exclusive basis for most agencies. Where an agency will not recoup GST from the Australian Tax Office, the expense will include any GST component.

Many individuals, partnerships and corporations provide services to agencies under contracts for services. However, not all such contractors should be categorised as consultants for the purposes of reporting. Consultants are distinguished from other contractors by the nature of the work they perform.

Agencies must carefully consider the nature of the task being performed when defining whether the expenditure is in the nature of a consultant or a contractor. Refer to the publication, *Engaging and managing consultants and indirect workers*:

[Engaging and managing consultants and indirect workers](#)

Note: indirect workers include professional contractors and workers engaged via labour hire arrangements

It should be noted that the *Queensland Procurement Policy 2021* requires certain government agencies to publish details of awarded contracts valued at \$10,000 and over on the Queensland Government Open Data Portal.
